

Home Fall Prevention Checklist

Adapted from CDC “Check for Safety”

Floors

- When you walk through a room, do you have to walk around furniture?
 - Ask someone to move the furniture so your path is clear
- Do you have throw rugs on the floor?
 - Remove the rugs or use double-sided tape or a non-slip backing so the rugs won't slip
- Are there papers, books, towels, shoes, magazines, boxes, blankets, or other objects on the floor?
 - Pick up things that are on the floor. Always keep objects off the floor.
- Do you have to walk over or around wires or cords (like lamp, telephone, or extension cords)?
 - Coil or tape cords and wires next to the wall so you can't trip over them. If needed, have an electrician put in another outlet.

Stairs and Steps (Inside and Outside your Home)

- Are there papers, shoes, books, or other objects on the stairs?
 - Pick up all objects on the stairs. Always keep objects off of the stairs.
- Are some steps broken or uneven?
 - Fix loose or uneven steps.
- Are you missing a light over the stairway?
 - Have an electrician put in an over-head light at the top and bottom of the stairs.
- Do you have only one light switch for your stairs?
 - Have an electrician put in a light switch at the top and bottom of the stairs. You can get light switches that glow.
- Has the light bulb in the stairway burned out?
 - Have a friend or family member change the light bulb.

- Is the carpet on the steps loose or torn?
 - Make sure the carpet is firmly attached to every step, or remove the carpet and attach non-slip rubber tread to the stairs.
- Are the handrails loose or broken? Is there a handrail on only one side of the stairs?
 - Fix loose handrails or put in new ones. Make sure handrails are on both sides of the stairs and are as long as the stairs.

Kitchen

- Are the things you use often on high shelves?
 - Move items in your cabinets so that you keep things you use often on the lower shelves (about waist level).
- Is your step stool unsteady?
 - If you must use a step stool, get one with a bar to hold on to. Never use a chair as a step stool.

Bathrooms

- Is the tub or shower floor slippery?
 - Put a non-slip rubber mat or self-stick strips on the floor of the tub or shower.
- Do you need some support when you get in and out of the tub or up from the toilet?
 - Have a carpenter put grab bars inside the tub and next to the toilet.
 - Look into shower chairs or raised toilet seats to further increase safety in the bathroom.

Bedrooms

- Is the light near the bed hard to reach?
 - Place a lamp close to the bed where it's easy to reach.
- Is the path from your bed to the bathroom dark?
 - Put in a night-light so you can see where you're walking. Some night-lights go on by themselves after dark.
